Results-driven Full-Stack Software Engineer with proven expertise in end-to-end web application development and performance optimization. Skilled in translating business needs into scalable technical architectures, from high-traffic user-facing platforms to complex internal SaaS tools. Proficient in building dynamic interfaces with React and TypeScript, managing robust backend systems with Node.js and PostgreSQL, and prioritizing verifiable web performance and code reliability.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Frontend:** JavaScript, TypeScript, React.js, HTML5, CSS3, SASS, Tailwind CSS, Bootstrap.
- **Backend & Databases:** Node.js, Express.js, PostgreSQL, MySQL, MongoDB, Supabase.
- **Cloud, Integrations & Auth:** Google Cloud Platform (GCP), AWS (RDS), Google APIs (OAuth2, Calendar, Drive, Docs, Gmail), RESTful APIs, JWT, Slack Webhooks.
- **Testing & Tools:** Jest, React Testing Library (RTL), Git, Lighthouse, PageSpeed Insights.
- **Soft Skills:** Cross-functional Collaboration, Agile Problem-Solving, UI/UX Translation).

PROFESSIONAL EXPERIENCE

Deevopp

Full Stack Software Engineer

Riga, Latvia (Remote)

February 2025 – December 2025

- Spearheaded the end-to-end development and performance optimization of core company products, from the main user-facing platform to a complex internal SaaS project management tool.
- **Performance Optimization:** Resolved critical rendering bottlenecks on the web and mobile homepage by optimizing assets and scripts; validated gains using Lighthouse, contributing to a traffic increase to over 10,000+ visitors.
- **Custom Solutions:** Engineered a real-time multi-language translation script utilizing optimized datasets to ensure rapid state changes and improve global accessibility.
- **SaaS Dashboard Architecture:** Built a comprehensive Kanban-style project management dashboard from scratch using React and TypeScript, featuring drag-and-drop task management and real-time progress calculations.
- **System Integrations:** Integrated robust authentication and Google ecosystem features (Google OAuth2, Calendar API, Drive/Docs APIs) to seamlessly sync company documents and events.
- **Backend & Reliability:** Maintained backend infrastructure with Node.js and Supabase (PostgreSQL), implemented event-driven Slack webhooks for user actions, and ensured code reliability using Jest and React Testing Library.

EDUCATION & CERTIFICATIONS

Specialized IT Courses & Bootcamps | 2023 - 2024

- **Frontend:** JavaScript University - Udemy
- **Backend:** Master on SQL & Node.js Programming Fundamentals - Udemy
